

FairPiece

We want to create a crowdfunding platform for fair produced fashion and accessories. Creative designers submit their ideas and the crowd has the possibility to support the designers and buy the items. We address young fashion-oriented people, who set value on unique and beautiful fashion pieces created by creative designers.

If the minimum order quantity is reached within 30 days the campaign is successful. The designer gets his share of the successfully funded campaign and we take care of the production process by a certified supplier. As only the sold items will be produced, there is no waste through over-production. The pieces are manufactured under fair conditions for fair wages and consumers can be sure to have made their contribution to sustainable consumption. The designer can work without pressure and be creative. They don't have to worry about production, shipping or administrative things.

Our vision is to create an international well-known brand that stands for fair produced and stylish clothes and accessories.
