

meepmee

meepmee combines a location-matching service and a social-matching service. A combination which is currently unavailable and we think of it as a natural extension of existing services as it provides the solution for two very distinct personal needs: getting to know your surroundings and making new friends.

meepmee connects people that share interest in the same sport and even guides them to a fitness centre or sports club where they can exercise close to them.

The service can be used through mobile apps for iOS and Android devices.

meepmee is a service that also provides high value for sporting facilities. Its users are highly focused and determined. meepmee therefore is an optimal platform to appeal to potential new members.

Advertisers will also benefit from the well-defined target group. meepmee offers an optimal environment for advertising in the segments of sporting goods, nutrition, wellness, outdoor activities and travel.
